

LIGHT RESCUE

SMALL IN SIZE, BIG ON STRENGTH.

E-ONE light rescues are small in stature, but have the strength and performance to back it up. Built with all the capabilities of other rescues, the E-ONE light rescue is designed with an integrated full main-frame to offer one of the industry's strongest rescue bodies.

E-ONE.COM

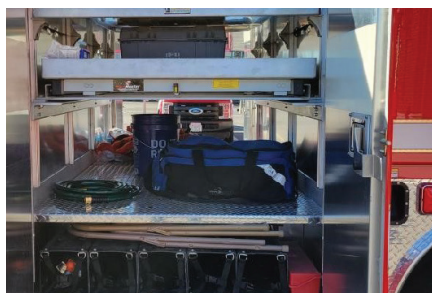

LONG SERVICE LIFE.

E-ONE light rescues offer custom body configurations that are built to last and endure the harsh environments they serve. Built with a 3/16" extruded aluminum body and frame, E-ONE rescue bodies will last multiple chassis replacements and still deliver the quality and performance you need for the long haul.

→ DEEP REAR COMPARTMENT

Configure your rescue with a deep rear compartment with custom trays and tool boards to meet your response needs.

→ LARGE TRANSVERSE STORAGE

Forward body compartments can be configured with transverse storage for longer tools and trays.

→ AIR SUPPORT

Compact fill stations are available with cascade and control panel.
